And end at Hagersville Elementary.

Distance: 2.7 km

What makes a community walkable?

- 1. You can get to places you often go**
People can easily walk to their workplaces, shops, schools, and restaurants from home.
- 2. You are safe along the route**
Safe walking routes are well-lit and separated from the road. They have well- designed sidewalks that are clear of ice and snow, slower traffic, crossing signals and street signs that are easy to read.
- 3. You can walk from home**
In a walkable community, people live close to each other in different kinds of homes. Their neighbourhood includes a variety of businesses, schools, stores, and restaurants.
- 4. You can get from one place to the next**
Sidewalks, trails, and pathways in the neighbourhood connect one area to another. They make it possible for people to get where they need to go.
- 5. You enjoy what you see**
A walkable neighbourhood is attractive, so people want to explore it. Walkers can enjoy the landscaping and the different types of buildings. They can sit if they want to take a break.
- 6. Everyone can get from one place to the next**
In a walkable community, people with wheelchairs and other mobility devices have the same access to all that our communities provide as people without these devices.

Hagersville Urban Trails

Health Action is funded by the Ministry of Health Promotion and supported by the Haldimand-Norfolk Health Unit. Health Action partners with 30 individuals and organizations, and promotes integration, communication and supportive environments that encourage people in our communities to live healthy lives.
