Signs of an Overdose

or snoring

Pinpoint pupils

Blue lips, nails or skin

Cold, clammy skin

body

Doesn't respond to shouting

Giving Naloxone by Nasal Spray

Shake shoulders and shout name.

Call 911 if unresponsive. (*Note: Canadian Law protects you from posession charges when you report an overdose)

Lay person on their back, Insert nozzle tip into one nostril. Firmly press plunger.

Perform rescue breathing and/or chest compressions.

If breathing has not improved after three to five minutes, perform step 3 and 4 again.

If breathing has resumed, place in recovery position.

-Hand supports the head.

-Head should be tilted back slightly.

-Knee stops body from rolling onto stomach.

STAY UNTIL EMERGENCY SERVICES ARRIVE! Naloxone can be administered every 3 to 5 minutes until emergency services have arrived.

DO NOT 🖉

-Stand them up - Put them in the bathtub/shower -Inject stimulants (e.g. meth)
